

# MARKETINGCONCEPTS

## THE CATALOG & WEB EXPERTS

We at Marketing Concepts know you depend upon Ability Financials™ and Microsoft Dynamics™ GP (formerly Microsoft® Business Solutions—Great Plains) to deliver your financial data reliably and consistently. We are very pleased to announce that Ability Financials has successfully completed application testing developed by Microsoft and VeriTest.

The Microsoft Dynamics GP Test for ISV Solutions program identifies applications that successfully integrate with Microsoft Dynamics GP. The test is intended to ensure that an integrating application:

- Doesn't cause the system to become unstable
- Doesn't corrupt the Microsoft Dynamics GP configuration
- Doesn't restrict the functionality of Microsoft Dynamics GP
- Is unlikely to become corrupted when Microsoft Dynamics GP is upgraded or updated

Ability Financials has also successfully completed similar VeriTest stability testing for Windows Server 2003 and SQL Server Testing.

Our business is your business, so we're committed to meeting the highest standards for software stability. The Microsoft/VeriTest results reinforce our dedication to providing quality software solutions. Thank you for your support; we look forward to continuing our number-one task—helping our clients achieve visibility, efficiency and success in today's competitive markets.

Sincerely,  
Christopher Buzzeo
